Pick’Tonic

Think about how you like your G&T.

If you fancy the bitter taste, choose more classic tonics with higher bitterness
If you usually squeeze few slices of lime to your drink,
citrusy forward tonics are the right choice.

Always remember:

**Any gin goes with any tonic,
so be creative and try new combinations.**

East Imperial – Singapore – gentle carbonation with lower sugar

Burma tonic - higher on bitterness
Highest level of quinine allowed, Classic style tonic.

Old World tonic - higher on bitterness
Unconventional revival of recipe from 1903. Lowest carbonation & sugar

Yuzu tonic - citrusy
Goes well with dry and citrus forward gins

Grapefruit tonic – fresh citrus / pomelo
Made with grapefruit and pomelo.

J. Gasco – Italy - medium carbonation with soft aroma

Indian tonic – light bitterness
Round flavour with bitter and sweet outline and fine carbonation.

London Essence – UK – light and complex, lower on sugar

Grapefruit & Rosemary – higher on bitterness
Good bitterness with less sugar. Ideal for London dry gins with herbal notes

Bitter orange & Elderflower – light bitterness
Sweeter notes go well with any Floral style of gin

1724 Tonic – Chile - lower carbonation with gentle citrusy notes

1724 – citrus light bitterness
Allows gin to come through without overwhelming bitterness.

Whisky from Scotland

The huge selection of **Speyside** malts offer a variety of strengths and can generally be broken down into two categories, the heavy, rich sherry flavoured malts and the more complex light floral flavoured malts. Speyside malts are essentially sweet whiskies, although some can have a little peaty character with just a slight whiff of smoke.

Balvenie 12	19
Macallan 15	31
Glenfiddich 15	26
Monkey Shoulder	19
Chivas 21 Royal Salute	46

The malts from these **Highland** distilleries are much less peaty than the malts which are found in the Islay region, although you can detect a slight whiff of smokiness. If there was a common character shared by West Highland whiskies it is they tend to have a sweet start and dry-ish finish.

Oban 14	21
Ardmore	20

Malts from **Lowland** region are light in colour and have quite a dry finish. The dryness comes from the malt itself, not from peat as Lowland malts tend to be produced with unpeated malt. You may also find a certain sweet fruitiness to the flavour. Lowland malts are regarded as an excellent aperitif.

The peat monster	19
Hedonism	24
Johnnie Walker Blue Label	48

Islay whiskies are the strongest flavoured of all Scotch whiskies and tend to be dry and peaty. They are renowned for their strong peaty smokiness which comes from the peat fuel which they use for malting the barley.

Bruichladdich (non smoky)	19
Caol Ila 12	26
Talisker 18	34
Lagavulin 16	22
Ardbeg Ten	22

The **Campbeltown** single malts are very distinctive, tending to be full bodied, renowned for their depth of flavour and also for their slightly salty finish. With peat adding a hint of flavour similar to that found in an Islay malt.

Whiskey of the world

The main difference between scotch and whiskey is geographic, but also ingredients and spellings. Scotch is whiskey made in Scotland, while bourbon is whiskey made in the U.S.A, generally Kentucky. Scotch is made mostly from malted barley, while bourbon is distilled from corn. If you're in England and ask for a whisky, you'll get Scotch.
